^a Submissions written in Spanish that were translated for this analysis.

^b Submissions written in French that were translated for this analysis.

^c While Educ'alcool originally submitted their response to the consultation in the 'NGOs' category, it was considered a 'private sector entity' in this analysis because of its ties with the alcohol industry, which provides part of its funding. This categorisation creates greater consistency in the data, given that other industry-funded NGOs, social aspect organisations and charities were already categorised as 'private sector entities' on the WHO website.
