Supplementary file 3. Items for Assessing Attitudes Toward the New ASP in Phase 2

The new system leads to:...

1. Greater control
2. Less unnecessary medications
3. Better distribution process
4. Less antibiotic resistance
5. Greater efficiency
6. Financially beneficial
7. Waste of time
8. Harm to physicians' status
9. Technical difficulties using system
10. Insufficient physician cooperation
11. infectious diseases consultants should not have authority to prescribe antibiotics

Questions for assessing overall satisfaction with the new ASP:

12. I am very satisfied with the new system
13. I would recommend to other hospitals to use the new system
14. I prefer the former system (reverse-scored).
